

## **CORPORATE MISSION**

Our corporate mission is to extract the resources of Mother Nature in a prudent, sustainable and economical way. As feedstock for our processes both primary and secondary raw materials from other processes / industries are considered. We want to become market leader, in our chosen niche, on both technological and qualitative terms.

## **QUALITY**

With its natural extracts and extraction technology Eco Treasures wants to offer a high quality product and/or service with proper assistance. Flexibility, reliability and technical support are our strengths as well as a constant high quality.

We focus on the pursuit of full customer satisfaction.

Also a good relationship with our suppliers is an essential component of this quality system.

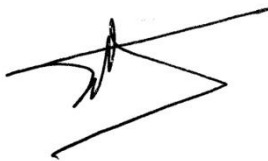

Quality is the daily responsibility of everyone within the company!

We expect our employees to actively participate in the pursuit of continuous quality improvement; we do not see this as a separate additional focus of the business but as an integrated part of all our activities.

To ensure and support all of these, a HACCP (Hazard Analysis Critical Control Point) system has been developed in order to guarantee the safety of our products and services. Our QMS is in accordance with the ISO9001 2008 standard version. To cover our products to the feed industry we apply the requirements of the 2008 GMP regulation.

In light of our corporate mission we aim, depending on the available feedstock, to perform our operations under the terms of an organic label.

In this way we want to meet customer requirements and to comply with legal obligations

Kris Schatteman
